No. 36

## ALBERTA COAL IN GREAT DEMAND

Were a freight rate in effect permanently which would put Alberta coal on a competitive basis in Ontario, orders would be on hand at once for at least a quarter of a million tons, declared Howard Stutchbury, trade commissioner of the province, who returned from what was virtually a tour of triumph through the eastern province. Mr. Stutchbury was superintending the distribution of the 6000 tons of Alberta coal sent east on the special rate of \$7 a ton by the Canadian National. He visited many points in Ontario accompanied by officials of the C. M. A. and all of these points were anxious to get Alberta coal, provided a freight rate was given that would make it possible. The Ontario governments, the C. M. A., the trade councils of the cities, the U. F. O. and other organizations have taken up the campaign, and are bringing pressure to bear upon the Dominion Government to bring about some solution of the problem of freight rates on the coal. A great deal of publicity supplied by the branch of the Alberta government is being used in the east, and Mr. Stutchbury's meetings were given widest possible publicity. He addressed at many as seven meetings in a day.

## SWISS EDITORS COMING

A party of seven Swiss editors are to visit the province during the coming week, in charge of officials of the C. P. R.

## —NOTICE—

Commencing September 2nd, I will open up a Boarding House in the Jackson Block. First class rooms, and meals prepared by all white help. A trial will convince you of our excellence.

Mrs. J. Stetzger.

## Wheat Pool Progress

There seems to be a tendency towards secrecy on the part of the wheat pool committee of seven these last few days and nothing very definite is being given out. This is perhaps explainable in the fact that there is not very much definite information that can be given out for a few days yet until the Saskatchewan drive is finished, September 12 to their closing date.

In the meantime while some reports state that many farmers are now withdrawing it is also pointed out that there are more contracts coming in than there are being withdrawn. In the meantime, H. W. Woods, President of the committee and two of the members have been in Winnipeg endeavoring to further arrangements with the Bankers Association and the elevator companies. With these however they have had little success so far as they both wished to see how the Saskatchewan drive would turn out before they would do much.

According to the latest reports the Saskatchewan objective will not be as closely reached as that of Alberta and this will have considerable influence on the matter. By next week a far more definite statement will probably be made one way or the other.

## The Saskatchewan Pool

The Saskatchewan pool is not likely to reach its objective, according to the latest estimate, and only a few hours remain for the end of the drive. The drive was more pronounced in Saskatchewan than Alberta. There is this difference between the Alberta and Saskatchewan pools. The Alberta contract provides that in case 50 per cent of the acreage is not signed up a farmer may withdraw. The Saskatchewan pool provides that the pool automatically ends.

## A STORY OF SPAIN

"Blood and Sand" Gives Rodolph Valentino Big Role

A story of colorful Spain, of moon lights, of scorches, of dancing and guitars—the land for passionate love-making—written by Vicente Blanco Ibanez, author of "The Four Horsemen," adopted by Jane Mathis, adopted by that production and directed by Fred Niblo, who directed "The Three Musketeers." Such is "Blood and Sand" starring Rodolph Valentino which comes to the Opera House next Friday and Saturday.

A story of hot, impetuous love against a background of the most dangerous sport known to man—bull fighting. Immense scenes there are of the bull ring, the tremendous crowds the impressive opening pageant and the charge of the bull, the cape play the foot work, the dangerous work of the devils who infuriate the bull, who dare the beast to kill them—and who often lose their dare.

The production is a distinguished one impressive in its sincerity, stirring in its theme, filled with the warmth of true love.

## AROUND THE TOWN

Mr. Bob Eubank of Edmonton is a visitor in town this week.

Mrs. Klaholt is visiting with her daughter in Crossfield.

Mr. H. Alkenthal was a business visitor in Calgary this week.

Sunday School in the Presbyterian church will be held at 2 p. m. from now on in place of the present hour of 10.30.

Miss Emma Brechin of Medicine Hat has taken the position of stenographer with the law firm of Freeman and Austin.

Mrs. I. Gardner of Calgary wishes to correct certain rumors that she had ceased her music classes here. She states that they will be held every Saturday as usual at Mrs. G. Smith's.

Mr. Bob Vogel and his sister Miss Vogel, of Los Angeles who were here on a months holidays were suddenly called back to the U. S. on Wednesday owing to the illness of their brother.

Harvesting is keeping the farmers all tied down to the land these days and some townspeople are also going out into the fields to help take in the crop. Didsbury should hum this year with the present bumper crop.

A meeting of the Didsbury Women's Institute will be held at the home of Mrs. Norman Clark, on Friday, September 14th. The ladies are asked to meet at Chambers Drug store at 2 p. m. where cars will be provided.

The Mountain View Women's Institute will meet at Community Hall on Thursday, September 20th at 2.30 p. m. and all members are requested to be present as there is a lot of business on hand. The roll call is to be answered by current events.

The Rev. H. Clay wishes it to be known that Church of England services are held twice monthly, on the morning of the third Sunday and the afternoon of the first at 11 a. m. and 3 p. m. respectively. Next service on Sunday, September 16th at 11 a. m.

Mr. MacMillan is relieving in the Accountancy of the Union Bank here. He is lately from Three Hills but before then was situated in Carstairs for some time. He is fairly well known around here having been closely connected with Carstairs sports for some time.

The Jutland W. C. T. U. met at the home of Mrs. C. R. Liesemer on Wednesday, September 6th, when about fifteen ladies were present. An interesting paper was read by Mrs. C. P. Barnes followed by a solo by Mrs. S. Liesemer. A dainty lunch was then served after which the meeting adjourned.

Worthy Grand Matron, Mrs. J. Fleet of Calgary paid a visit to the local Chapter of Order of The Eastern Star a week ago Monday night. There was a large attendance including a goodly number from Olds. The usual annual business and ex-emplications were gone through followed by a social hour and the usual toasts, all enjoying a pleasant evening.

Mr. Wm. Leadbetter was installed 22 Grand Sentinel of the Grand Chapter of Alberta by the Past Grand Worthy Matron, Mrs. Duff of Olds at the meeting of the lodge.

**BORN**—To Mr. and Mrs. J. H. Lowrie at their home here on Tuesday, a daughter.

**BORN**—At the Didsbury General Hospital on September 6th, 1923, to Mr. and Mrs. E. Jackson, a daughter.

## Looking Forward

The more you think about the future, and about Opportunity and Success, the more enthusiastic you become about being a money saver.

If you have mastered the art of saving, you can forecast with reasonable accuracy how much of a factor you will be in the days of opportunity which are drawing near.

"Double your Savings!  
It CAN be Done."

or, dairy commissioner. This goes  
further confirming sales Alberta, Nova  
Scotia, Quebec, Ontario, Manitoba  
and Saskatchewan. This is one of  
the best records ever made by butter  
exhibits from this province.**STRANGE NOW, BUT  
RADIO MAY DO THIS**Are you interested in radio? Do  
you believe it has great possibilities?  
If, so, see what Marshall Nelson does  
with an idea he has put into his new  
First National release "Minnie" now  
being shown at the Opera House in  
worth seeing.Nelson gives a demonstration of  
the suggestion that some day the  
radio will be used to transmit power  
to motivate railroad trains, trucks,  
water pumps, automobiles. He shows  
an elaborate radio set in a barn  
back of a small Iowa hotel where  
the main part of the picture takes  
place. Minnie's father is the owner  
of this hotel but he pays so much  
attention to his radio that Minnie is  
the drudge, the slave of the place.  
But that last all of Minnie's trou-  
bles. She's lonely. Everybody tells  
her so. In seeking revenge she gets  
herself into a peck of trouble—trou-  
ble that puts considerable humor  
into the picture. Marj Moore as the  
inquisitive, forgetful reporter adds  
more fun.When Minnie's father gets the  
power radio working it does some  
wonderful stunts and shows what  
the results will be if the idea is ever  
perfected. And it may be made to  
work as the picture shows—by ac-  
cident.**Here and There**Protection of migratory birds has  
been added to the duties of the  
Canadian Pacific Railway's constabulary.Airlines attached to the Ontario  
Forestry Department are now  
equipped with radio sending appar-  
atus so that they can keep in con-  
stant touch with the chief and other  
rangers.There was an increase of sixty-  
three per cent in the number of im-  
migrants to Canada during the last  
three months as compared with the  
corresponding period of last year.Canadian Pacific agents in British  
recruited nearly five thousand  
men for work in the harvest fields  
of Western Canada and, through  
lack of sleeping accommodation,  
closed their doors on as many more  
who, attracted by the special har-  
vest rate, sought to enter Canada.The branch line program of the  
Canadian Pacific Railway carried  
out this year will bring into opera-  
tion on the prairies a larger mileage  
than any one year since 1914. Of  
the 431 miles of line under construc-  
tion, 281 miles will be ready for  
handling grain in the Fall, and of  
the balance, 150 miles will be ready  
for use by the winter freeze-up.A building has been acquired by  
the University of Toronto to be en-  
tirely devoted to the manufacture  
of insulin. This will be the only  
factory in Canada and, through  
lack of sleeping accommodation,  
manufacture and, although it is man-  
ufactured in the United States, Great  
Britain and Denmark, the Canadian  
product will be sold throughout the  
world.Dawson City recently celebrated  
the twenty-seventh anniversary of  
the discovery of the Klondike in  
an exhibition of Yukon products  
weighing thirty pounds, potatoes as  
big as a man's head, pumpkins as  
big as watermelons, wheat, oats and  
barley were witness to the fertility  
of the Yukon soil. Side by side  
with these ranged gold nuggets,  
gold dust and silver bars.Dr. James Inches, Commissioner  
of Police, Detroit, and a guest at the  
Canadian Pacific Bungalow Camp at  
Nipigon, holds the record for the  
biggest speckled trout caught in the  
Nipigon River this season, having  
captured a fish weighing 7½ pounds.  
This catch was above the average,  
but a large number of six pounders  
have been taken from the Nipigon  
this season. Several years ago, and  
from practically the same place, Dr.  
J. W. Cook, of Port William, caught  
the world's record speckled trout,  
which weighed fourteen and one-half  
pounds, and was more than two and  
a half feet long.A record was established recently  
when one of the latest type of Canadian  
Pacific locomotives drew a train  
of 42 cars of newspaper, weighing  
more than 1,100 tons, from the plant  
of the Abitibi Pulp and Paper Com-  
pany, North Bay, to Toronto, with-  
out mishap. Ordinarily, it would  
have taken two passenger engines  
to haul such a load for the 320  
miles. After proving its worth by  
this feat the huge engine, together  
with all steel train consisting of  
the latest model tourist, dining and  
sleeping cars, and a baggage and  
equipment car, formed part of the  
Canadian Pacific exhibit at the Na-  
tional Exhibition at Toronto.**The Didsbury Pioneer**Member of the Canadian Weekly  
Newspapers' Association.

WEDNESDAY, SEPTEMBER 12th.

**READ THE ADS**Progressive business houses are  
finding the value of advertising to  
them is increasing week by week.  
Business men always read the ad-  
verts of their local papers and the  
dailies to find where they can buy to  
the best advantage. They also read  
the attractive catalogues sent out by  
mail order houses, and are guided  
largely in their buying by the read-  
ing of these various publications.The local merchant has the ad-  
vantage over the other agents that  
are competing for custom, that he is  
close to the customer, and can sup-  
ply the goods at the time of pur-  
chase. When he advertises he in-  
creases his advantages proportion-  
ately.The merchant of the local towns  
are entitled to the business of their  
district, provided they meet com-  
petition in price and quality. The  
stores that are doing this and ad-  
vertising steadily are getting the  
business of their districts.The moral to business men is,  
therefore: If you have an effective  
advertising medium available, make  
use of it, and to the buyer: read the  
adverts and buy on a business basis.**BERGEN-NICHE VALLEY**We were the recipients of excellent  
hay weather this last week, and our  
barns show that we took advantage  
of it.Mr. W. Blain of Eglon, has been  
out the past week helping the boys  
to harvest the green feed. It was so  
tail and heavy that it will take some  
good weather to cure it.Mr. Joe Parrell sold his farm a  
few days ago, then he and his wife  
went to Bergen leaving Helen and  
Gene at home. The house caught  
on fire and burned to the ground,  
destroying everything they owned in  
clothing and furniture. Mr. Parrell  
will build a new house at once.They have the sympathy of the  
community.Mrs. Chris Veiker of Bergen died  
at her home on Saturday morning.  
The funeral will take place at the  
schoolhouse Thursday at 2 p. m.Mrs. Veiker was an estimable  
woman and leaves a husband and  
several small children who will miss  
her sorely in the home.Mr. Skogje, John Elanga's brother,  
brother-in-law, arrived from Norway a few  
days ago. Mr. Skogje is noted as  
a wonderful man with the axe. He  
can cut more timber than an ordi-  
nary expert axman.N. T. Hagan has again taken over  
his store at Saddle and will carry a  
large general store stock of cloth-  
ing, hardware and groceries.Dave Allen and Alex Brown are  
out harvesting.**A SQUARE PEG  
in a Round Hole**You may be alright, but if  
you are in the wrong position  
you are like a square peg in a  
round hole. You want a  
position where you fit.This paper is read by in-  
telligent business men, and a  
Want Ad in our classified  
columns will reach them.**BUFFALO HERD GROWS**So fast has the Dominion govern-  
ment buffalo herd at Wainwright  
grown that it is now found neces-  
sary to slaughter 2000 head. A con-  
tract has been given for this to an  
Edmonton man, and a factory for  
the manufacture of pemican from  
the buffalo meat is to be establishedin Edmonton. This food is used ex-  
clusively in the north.**VOLUNTEER FOR HARVEST  
HELP**Nearly 150 men students from the  
two normal schools in Calgary have  
volunteered for work in the harvest  
fields of the province, and have been  
granted leave for a month from  
their studies, for that purpose.**CANADIAN

## Our Harvest Help

Every year Western Canada is confronted with the task of securing an adequate supply of men to harvest and thresh the large and increasing grain crop grown throughout the prairie country. It is a problem of some magnitude, and one that calls for careful organization, great foresight and wise management on the part of those entrusted with the work. This year has been no exception to the rule; in fact, prospects of one of the heaviest crops in the history of the country only served to intensify the problem and add to the vital importance of satisfactorily solving it.

Plans for the securing of tens of thousands of harvest hands have to be made weeks before the actual work of cutting the grain begins. Those plans, both as to the number of men likely to be required and the dates upon which they should be available to go into the fields, must be made on the basis of estimates which may later be completely upset as a result of weather conditions. What from all appearances indicates a bumper crop in late June or early July may be nullified almost through no one's fault, by a prolonged spell of wet weather, or severe hot storms, or various pests and blights, and only an average, or less than average, crop results. An anticipated early harvest may be considerably delayed with the result that men are on hand before the farmers are ready to engage them, or conditions may hurry the crop onward to a rapid ripening and a change goes up for men before they are available in sufficient numbers.

This year, with prospects in late June and early July of the heaviest grain yield in the history of the West, with a general consensus of opinion that the Western wheat crop would approach closely to the 500,000,000 bushels mark, and with estimated requirements of approximately 60,000 harvest hands, steps were taken by Government departments and transportation companies to meet the need. As a result, arrangements were made to bring men not only from the other Provinces of Canada and the United States, but from the British Isles as well. Some four or five thousand men have, therefore, been brought across the Atlantic to help in the harvest, in addition to tens of thousands from Eastern Canada and British Columbia and hundreds from the United States.

Many of these men are prepared to remain as permanent settlers if they are pleased with their treatment here and find conditions are promising for their future success. Inasmuch as Canada requires additional population as one of the chief essentials of its continued growth, development and prosperity, it is of the utmost importance that everything possible be done to retain the maximum number of these men.

Government and transportation companies having done their part, it now remains for the individual farmer to do his. Undoubtedly, the vast majority of farmers treat their temporary help fairly and decently, and while expecting and requiring of them hard work and long hours, see to it that they are comfortably housed, well fed, treated with reasonable consideration and paid promptly and adequately for services rendered. But in past years there have been numerous complaints, nevertheless, that conditions under which harvest hands have been obliged to work, and the business relations existing between farmer and employee, have not been all that they ought to have been and certainly not conducive to creating a favorable impression among these strangers in our midst.

Western farmers have everything to gain and nothing to lose by recording the very best treatment possible to their harvest help. The letters which these men write to their old homes, and the impressions they take back, will constitute either the very finest or the very worst advertisement for this country. The opinions of these men will either exonerate fully immigration, or will hurt it. Their reports on the country and their treatment here will either make the work of recruiting labor of obtaining an adequate supply of harvest help which needed under the years past of increasing difficulty.

And the more difficult that task, the more the farmer will be made to feel.

It must be remembered that the expense to these men in coming long distances for only a few months' work is fairly heavy and they are entitled, under the circumstances, to good wages. If adequate wages are not forthcoming, these men will take nothing to show for their labor and the expense to which they have come, and not only will they not repeat the experiment, but they will discourage others.

This is not to say that these harvesters are justified in demanding excessive wages, nor in adopting any hold-up policy. There is a limit which a farmer can pay for his harvest help, and in view of the present economic condition of Western agriculture, that limit is not a high one and to exceed it means ruin for the farmer.

The point of this article, however, is that quite apart from the question of wages, the individual farmer can do much to make his hired help satisfied, and a friend and booster for Western Canada instead of a critic and knacker. Many of these young men come from good and comfortable homes and they resent being treated as dirt and hives out of work looking for an easy job.

There is good and bad among them, but with the majority Western Canada is on trial. Therefore, treat them well.

## Canada's Forest Wealth

Yearly Revenue From All Branches Is \$220,000,000

Of the total area of forests in the British Empire, Canada holds over 50 per cent. In Canada more than 25 per cent of the forest area is public.

## THE OLD RELIABLE

Minard's gets at the root of the trouble. Stops inflammation, deadens pain.

It is owned. The Canadian people gain from their forest possessions the substantial annual revenue of \$220,000,000, representing the production of all branches of their forest industries. More than 100,000 men are engaged in Canada converting forest products into wealth in some form or other. Nearly 100,000 other people depend on this "forest army" for their food and shelter. In the pulp and paper mills are 75,000 men, drawing \$10,000,000 a year in wages. The lumber industry pays 55,000 men \$60,000,000 wages annually.

## Capital For Calgary District

Among the harvest handstudies brought to Western Canada in August by the Canadian National Railway from overseas was a Swiss farmer with \$75,000 to invest in a farm. He was recommended out of Winnipeg to Calgary, where he intended to settle.

## Fruits Grow Well

Industry Is Growing On Southern Alberta Irrigated Lands

Displays at the Lethbridge fair this year have established the fact that tree fruits can be grown successfully in certain districts of Alberta. Fruit garden farmers in the south had displays of cherries, plums and small fruits, as well as of tobacco. All of these were grown on irrigated lands. One interesting exhibit was that of the United Farmers of Alberta, at Vauxhall, which showed fifty different soil products. Fruit growing has been taken up in several parts of both Southern and Northern Alberta with considerable success, and this industry is taking on larger proportions each year.

## Wheezey Chest Colds

Trained Nurse Tells How Colds Are Quickly Broken Up

## NERVILINE

A Home Necessity

Shocking of valuable home remedies that every mother should always keep on hand, Nurse Carrington says, "I haven't seen one more dependable than Nerviline." It is the ideal treatment for colds, coughs, croup, whooping cough, influenza, and all other respiratory ailments. It is a safe, reliable, and effective remedy, and it is a home necessity. It is a home necessity. It is a home necessity.

## Peaches For Great Britain

An experimental shipment of several thousand cases of peaches will be made to Great Britain next month by the Ontario Department of Agriculture. Large handsome peaches of good quality are being selected for this shipment, which is expected to be the forerunner of a considerable development in Canadian export trade.

## SYMPTOMS OF ANAEMIA

An Inherited Tendency to Anaemia May Be Overcome

Some people have a tendency to become thin-blooded just as others have an inherited tendency to rheumatism, or to nervous disorders. The condition in which the blood becomes so thin that the whole body suffers comes on so gradually, and so little that it is often with a natural disposition in that direction should watch the symptoms. Nervousness, bloodlessness, or anaemia, as the medical term is, can be corrected much more easily in the earlier stages than later. It begins with a tired feeling that rest does not overcome, the complexion becomes pale, and heartbeats are an slight exertion, such as going up stairs, is noticed.

Dr. Williams' Pink Pills are a home remedy that has been most successful in the treatment of diseases caused by thin blood. When pure air and wholesome food these blood-making pills afford the correct treatment when the symptoms described are noticed. You can get these pills through any dealer in medicine or by mail, post-paid, for a box from The Dr. Williams' Medicine Co., Brockton, U.S.A.

Only a millionth can afford to wear a milk suit.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

If an employee doesn't know his place he need not expect to keep it long.

## Improve Your Complexion By Using Cuticura

Largest 50¢ Box, Sold at 25¢.

## Farmers Moving to St. Walburg

Leave Drought Area in Southern Saskatchewan to Farm in North

A number of farmers in the dried out section of Saskatchewan, south-west of Swift Current, have moved away and settled in the St. Walburg district at the end of the dried out C.N.R. northwest of Battleford, according to John Balfour, who returned to Regina from a business trip to that section of the province.

Mr. Balfour said that settlers in this farthing district appear to be making good. Being a bush country, he said, the district calls for a different type of farming to the open prairie, but many of the settlers, while clearing their land, are making a stake for themselves by such side lines as fishing and trapping.

During last winter, fish valued at \$50,000 were shipped out from St. Walburg, and the fur pelts consigned from the same point were worth approximately \$25,000. "Of course," he said, "the shippers were not all farmer settlers, some of the produce being shipped out by those making a living as fishermen or trappers. The farmers, however, are doing a certain amount of fishing and trapping, and game and fish, together with an occasional deer, help them to tide through the winter."

Practically every farmer in the district has one or two milk cows, according to Mr. Balfour, though the dairy industry has fallen off somewhat during the last year or two on account of lower prices for dairy produce. Most of the settlers are clearing their land by fire and the amount of land on which any one cultivator is comparatively small at the present time.

## Thinks Swearing All Right

Yes, providing the provocation equals the offence, Jones stepping on Smith's corn crows. Far better to use "Putnam's Painless Corn Extract" than to swear in a hurry. No corn can last if "Putnam's" is applied. Refuse a substitute. 25c every where.

## Returned Soldiers' Insurance

All Members of Canadian Expeditionary Force Are Eligible

The Returned Soldiers' Insurance Act has a provision that applications for either new or increased insurance will not be accepted after September 15, 1925. It therefore behooves every ex-serviceman who is desirous of taking out this insurance to immediately get in touch with any office of the Department of Soldiers' Civil Re-establishment or by writing to the Commissioners, Returned Soldiers' Insurance, 101 Building, Ottawa, Ont., where the necessary application forms may be obtained.

All members of the Canadian Expeditionary Force, whether they went overseas or not, are eligible for insurance. There is no medical examination required. The rates are extremely low and the premiums may be paid in monthly instalments, and in the case of pensioners their first premium must be paid in cash but should they so desire, subsequent premiums may be paid by deductions from the monthly pension cheques.

The amount of the smallest policy is \$500 and are issued in denominations of \$500 up to a maximum of \$5,000. As an illustration of a way in which the Returned Soldiers' Insurance plan works out we will take an ex-serviceman now 39 years of age who takes out a \$5,000 policy on the 20-year payment plan, the cost of this policy to him in premiums is \$9.99 monthly, at his death his beneficiary will receive \$1,000 in a lump sum and the balance will be paid over in 5, 10, 15 or 20 years, whichever period insured desires.

Any further particulars required regarding this insurance will gladly be furnished on application to either of the offices of the Department of Soldiers' Civil Re-establishment in this province which are situated at the Veterans Block, Regina, Sask., and the sub-office, 514 Canada Building, Saskatoon, Sask.

Th Many Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable to catch colds to similar ailments and mishaps as afflict mankind, and it is highly amenable to the healing influence of this oil and remedy which has made thousands of men friends during the past fifty years.

# MAGIC BAKING POWDER

Magic Baking Powder is scientifically made and has never failed to give the maximum leavening efficiency. Because of this and the uniformly satisfactory results obtained by its use we recommend it as Canada's perfect baking powder.

Cobalt Produces Bulk of Arsenic

The production of arsenic in Canada in 1921 amounted to 2,576 tons, valued at \$221,937, which was an increase of 72 per cent in quantity, but only 37 per cent in value over the production of 1921. Approximately four-fifths of this was produced in the smelting of the silver-cobalt-nickel ores of Northern Ontario.

## General Smuts Urges European Nations To Support Great Britain

Attenton, South Africa.—An appeal to South Africa to stand in sympathy with Great Britain in her fight to save Europe from destruction, was made by General Smuts in an address here. The Premier was given an ovation upon his first public appearance after his recent independence.

The Premier covered all the nations in Europe, great and small, in rallying round Britain and avert a world-wide disaster. The position today was grave beyond words, the Premier said, and if the United States saw the European nations supporting Great Britain, he had faith that the United States would again rush to the rescue, and save the breakup of Europe, the consequences of which might not be wiped out for a century.

If all the nations acted together, Premier Smuts continued, there was still a possibility that France would see her danger before it was too late. The dissolution of Germany would be a far more serious thing than the fall of Russia. If Germany broke up, civilization would be put back a century or more. Whether Europe could stand the shock it would find difficult to say, as there was even a prospect of a breaking of the chain of command. "South Africa," declared Premier Smuts, "cannot cut itself out from Europe because she is a small outpost with dangerous surroundings—a small outpost in a black continent—and if Europe went under we could not prevent the consequences and could not dissociate ourselves from Europe and her sisters."

## Regulated Migration Is Veterans' Policy

Would Tend to Build Up British Race Within Empire

Ottawa.—Official reports of the Imperial conference of the British Empire Service League in London last month have just been received by the Dominion Command, Great War Veterans' Association, which is the central thrust organization of the league for Canada.

The outstanding decision was that dealing with the question of Empire migration. A resolution approved the principle of regulated migration for land settlement within the Empire was adopted. The opinion was expressed that suitable schemes would materially assist in the establishment of industry and tend towards the solution of the unemployment problem combined with the building up of the British race within the confines of the Empire. The league was pledged to assist regulated schemes in every way possible. The view of the league will be presented to the Imperial Conference in London in September.

## Fears Economic War With Britain

France Convinced Campaign Against France Exists in London

Paris.—Surgeons of an economic war between France and Great Britain are met with frequency in current conversations with leading French business men engaged in trade with Great Britain and now are creeping into the press.

Large importers of goods from Great Britain express the view that business between the two countries will necessarily decline on account of the extraordinary rise in the pound sterling and that the organized move was confined to trying to limit about as it was the inevitable outcome of what is declared here to be the London campaign for the depreciation of the pound.

The Math has asked Premier Baldwin if he is not aware that his policy toward France is tending to bring about a movement in which the watch word will be, "No business with England; no purchases in England."

The balance of trade which was favorable to France until 1914 was turned by France's war needs and has since remained favorable to Great Britain. France, it is pointed out, could easily turn the balance to her favor by abstaining from purchases of British coal which she might get along without if the Ruhr production increased and measures for economy in heating and lighting were adopted. She could also largely reduce the unfavorable balance by adopting the policy of securing French-made woodstoves.

French business men appeared to be convinced that a campaign against the franc really exists in London, and that it was organized by bankers in sympathy with the British Government.

## Hon. Jas. Murdock Is Given New Task

Will Administer New Act In Respect To Trusts

Ottawa.—Hon. James Murdock, Minister of Labor, has been charged with the general administration of the act which provides for the investigation of combines, monopolies, trusts and mergers. It has been announced by Premier King.

The act, which was passed during the session of Parliament, confers wide powers upon the officials in charge of its administration. It provides that an investigation may be ordered upon a complaint supported by six persons, and for the appointment of a permanent registrar to conduct the preliminary work.

Penalties which may be imposed where convictions are secured take three forms, first, the responsible parties may be proceeded against under the Criminal Code, second, any tariff protection enjoyed by the concern may be withdrawn, and, third, proceedings may be taken before the exchequer court to cancel patent rights.

## Cannot Build Highways

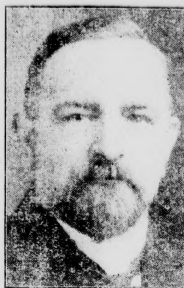

Regina.—Addressing the Kwanit Club here, Hon. J. G. Gardiner, Minister of Highways, stated that lack of population in Saskatchewan prevented the building of more highways at present. For some time to come, he declared, the question of providing better facilities for those settled on the land must be kept in the fore and for that reason demands for the building of improved highways for the accommodation of tourists must be ignored.

## Improvements For Ellis Island

London.—Sir Auckland Geddes, British Ambassador in the United States, in a report on the condition of Ellis Island, makes a dozen recommendations regarding needed improvements, principally structural alterations for sanitary improvement, heating, ventilation and the like, and better medical examination rooms.

## Ready to Compete With Coal From U.S.

Alberta Coal Men Willing to Ship to Ontario Despite High Freight

Toronto.—Premier Ferguson was welcomed upon by a delegation of Alberta coal men, headed by Sir George Fleming, who declared they were prepared, during the coming fall and winter, to ship to Ontario in quantities sufficient to compete successfully with United States coal, despite the high freight charges.

They asserted the coal would be positively of the first quality, competing favorably with United States anthracite. They proposed to ship by rail to Port Arthur and by boat from there, thus effecting a substantial reduction in rail haulage charges.

Sir George and his associates in the conference are interested in the Don Valley, better mining region. The announced object of their visit to Ontario is to endeavor to interest investors here in the western mines as a source of their winter fuel requirements.

## French Cruiser Launched

Is First of Three on New Naval Program

Brest.—The new light cruiser Duquesne of the French navy was launched here in the presence of Minister of Marine Rabier. Speaking at the ceremony the minister said that his 8,000-ton displacement ship would race on 10,000 horsepower, and contrasted this with the pre-war battleships of 25,000 tons displacement and a maximum of only 30,000 horsepower. Her speed will be only 34 knots an hour.

She is the first of the three light cruisers forming the naval program voted in April, 1922, to be completed. Work on the second was begun at Lorient in January and the third will be built here.

## Prince May Arrive Sept. 10

Quebec.—When the Empress of France docks here on September 10 it is understood she will have as a passenger the Prince of Wales. Though no official announcement has been made, it is reported that the Prince will have six people in his party. Suite No. 4 on the liner is said to have been reserved for the Prince.

## Suggested Candidates for Nobel Prize

Toronto.—That Dr. F. G. Banting, discoverer of insulin for diabetes treatment, and Professor J. J. R. McLeod, of the University of Toronto, may be presented as candidates for the Nobel prize this year has been announced at Edinburgh, where these two scientists have been attending the eleventh international congress of physiology.

## Valera Taken Prisoner While Making Election Speech To Constituents

### Many Miners Lose Lives

Bodies Found Mile Underground After Wyoming Mine Explosion

Kemmerer, Wyoming.—Kemmerer is in mourning for the miners—57 of them—who are known to have lost their lives in the explosion at Kemmerer Coal Company Mine No. 1 at Frontier, near here.

Throughout the day and night hundreds of relatives and friends thronged the L.O.O.F. hall, which has been turned into a temporary morgue, and also to a local undertaking establishment, where half the bodies were being kept.

The latest official report is 27 miners dead, one missing and 27 rescued alive and unhurt.

The mine is considered one of the deepest in this section, it not in the United States. The main shaft goes down at an angle of 16 degrees to a depth of about 8000 feet, and it was on the lower levels, or about one mile underground, that most of the bodies were found.

## Judge Says Seizure Of Rum Ships Legal

Foreign Vessels Smuggling Liquor Into U.S. Can Be Taken Outside Limit

New York.—Seizure of alien rum-running vessels that loiter outside the three-mile limit was held legal by Federal Judge Woodruff in a decision handed down in the case of the British ship, Marion Mosher, seized while transferring a liquor cargo to the United States owned motor boat J.H.D., eight miles off the coast near Fire Island, July 27, 1922.

Bonds of the Detroit Fidelity and Surety Company, given after the seizure of the craft as a guarantee that it would proceed to its supposed destination, St. John, N.B., were declared forfeited, it being contended that although the vessel arrived at the Canadian port, she did not have her cargo, thereby violating her agreement.

Judge Woodruff held that seizure of foreign ships engaged in smuggling liquor into the United States was justifiable even though they were on the high seas.

## Merchant Marine May Be Utilized

Government Vessels Can Be Used To Carry Grain

Ottawa.—Ten vessels of the Canadian Merchant Marine now on the Great Lakes, may be used to the grain carrying trade this season, it was announced by Hon. Geo. P. Graham, Minister of Railways and Canals.

Use of the Government boats to assist in solving the problem presented by the refusal of American ship owners to comply with the new grain rate regulations has been under consideration. It is understood that Sir Henry Thornton will be called into consultation in the matter and should the American owners persist in their refusal to fulfill the transportation vessels will be utilized.

Asked whether the Government boats were of that type which would lend themselves to use in the grain traffic, Mr. Graham replied that while not exactly built for that purpose they could be satisfactorily employed to carry a portion of the western crop.

## Many Miners Lose Lives

Dublin, Ireland.—Eamon De Valera, "President of the Irish republic," is just in the custody of the Free State authorities. He was arrested here as he was starting an election speech to his constituents. He had boldly announced his coming, and when he took his position on the rostrum of the market square, Free State troops threw a column about him.

The crowd that had gathered had given him a tumultuous reception and he had just started his address in Gaelic when a shout arose, "The soldiers are coming." Simultaneously armored cars rattled up to 125 vicinity of the platform.

The crowd, made up of men and women, fled in all directions as the soldiers fired several volleys over their heads. Many of the women ran.

As several soldiers rushed toward the platform, De Valera was seen to sway and then to collapse. At first it was thought the republican leader had been shot, but it turned out he had only fainted, probably in consequence of a blow he received during the stampede.

When he recovered, De Valera was assisted down the steps from the platform by troops. He waved aside a number of persons who were seeking to detain him and was rendered to an officer, who received him with a kindly "come along."

When the first panic had subsided, the people who had been about the platform returned to the market square. Many of them lay in waiting for the troops, and for a moment the situation looked ugly. The troops, however, took things calmly, fixed their bayonets and soon restored a degree of order. Then, with a huge crowd following him, the Valera was taken to the county jail. He offered no resistance.

## Greeks Pay Interest On Debt

London.—The Greek Government have paid to the Dominion of Canada, on account in London, \$25,000 interest on its debt to the Dominion, which is approximately \$6,000,000. The \$25,000 interest is for the first six months of this year.

## YOU GET THE AMOUNT OF THAT CHEQUE

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER, whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year which means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and suggestions on the operation of all kinds of farm machinery from a washing-machine to a tractor. Its editorial staff consists of men thoroughly familiar with every branch of farming both from the practical and theoretical standpoint. Every month the magazine publishes extensive news in its readers. Many of these are short cut findings that are real money savers to farmers.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this weekly, then why not take advantage now. Your subscription to this weekly together with a year's subscription to the CANADIAN POWER FARMER for the same price as this weekly alone. This is where you get the \$1.00.

Mail your cheque or drop into our office the first time you are in town.

GET YOURS TO-DAY

## NINTH SEMI-MONTHLY CROP REPORT

Issued by Department of Agriculture, Edmonton, Alberta, Friday, September 7, 1928.

Cutting of wheat is practically completed in the southern half of Alberta, and threshing is well started. Cutting of oats has commenced. In the northern part of the province cutting of wheat is about 50 per cent completed, the grain having been somewhat slower in ripening in these districts. Threshing will not commence in the northern part for another week or ten days. Very little of the oats crop has been cut as yet north.

The weather during the past fortnight has been showery in the northern districts, causing delay in harvesting in some parts. At the present date ideal harvest weather prevails. Reports of frost in one or two districts have been received, with slight damage to grain.

Sufficient threshing has not yet been done to verify estimates of yields, but early returns from the separators appear very favorable. Grain delivered to elevators in the southern districts has been grading chiefly No. 1, with some heavy individual yields reported.

### Harvest Labor

The labor department of the government has placed to date approximately 12,000 harvesters in the field, and this number has been supplemented by about 1000 who did not pass through labor bureau. The situation now is well in hand, and the bureaus are sending a number of men every day. With continuance of the fine weather, a re-distribution of harvest help will occur that will meet any shortage that might be felt.

**FARM FOR SALE**—N. E. 36, 31.4 W. 5 and N. W. 31.3, 31.5 W. 5. Price \$4,600. Reasonable cash payment and balance at 6 per cent. Send offers to W. J. B. Caanin, Macklin Sask. S33

## All Roads Built and Maintained By Government In Future In Quebec.

Premier Taschereau, of Quebec, made public an interesting statement a short time ago. He was dealing with the financial position of his province. He said that the revenue of Quebec was now so buoyant and certain that in future the government would not only carry on its extensive programme of road construction, but would also maintain the roads in good condition after they were built.

He said it would no longer be necessary to ask farmers to pay taxes for road building, nor would it be necessary to ask the municipalities to spend money to keep the roads up.

In addition, he declared, there was not much sense putting money into roads unless they were kept in good state of repair after they were constructed.

So the government proposed doing the whole thing, asking for neither taxes nor work from the people living along the roads.

Premier Taschereau said that this

policy was made possible because the province is now getting the revenue that formerly went to boot-loggers and others.

At the same time, the government, by controlling all sale of liquor itself, had abolished the bar, had practically killed the business of boot-legging, had reduced drunkenness to a minimum, had placed beer within the reach of the poor man instead of confining the liquor to the rich, and had assured the sale of chemically pure, guaranteed liquor to those who bought it.

In other words, the method of government control and sale produced true moderation, and the revenues of the province were benefitting instead of the illicit dealer.

That is something to think about, especially when we, in this province, ponder over the revenue tightness here, and the constant and heavy taxation—with the promise of heavier taxation unless something is done to keep it down.      Adv.

## We Stock
